Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 19 December 2002.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 4-6 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 4,149,424 to Bowcott.

Bowcott clearly teaches the construction of a starter motor comprising:

a case (10);

a rotor assembly (rotor 12, shaft 13, and pinion assembly 14), the rotor assembly residing inside the case, the rotor supported by the case for both rotary and linear motion;

means (solenoid 15 and plunger assembly 17) for linearly translating said rotary assembly with respect to the case;

means (rotor coils) for rotating the rotary assembly with respect to the case;

means (spring 19) for preventing rotation of the rotor assembly until the translating means linearly translate the rotor assembly; and

a method for operating an electric motor comprising:

Art Unit: 2834

restraining the rotation of the rotor assembly when the rotor assembly is in a first position;

energizing a translate coil, the energized coil interacting with a rotor assembly to linearly move the rotor assembly; and

energizing a rotation coil, said energized rotation coil interacting with the rotor assembly to rotate the rotor assembly.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 4,149,424 to Bowcott in view of U.S. Patent No. 5,291,084 to Shiotsuki et al.

Bowcott disclose the construction of a starter motor as described above.

However, it fails to disclose stator having unequally spaced poles to induce the motor to turn in a predetermined direction.

Shiotsuki et al. teach the construction of a stepping motor having at least one set of asymmetric stator pole teeth for the purpose of providing pole teeth which are shifted from the center between the pole teeth of the inner yoke in a specific direction.

It would have been obvious to one skilled in the art at the time the invention was made to use the pole teeth arrangement disclosed by Shiotsuki et al. on the starter motor disclosed by

Bowcott for the purpose of providing pole teeth which are shifted from the center between the pole teeth of the inner yoke in a specific direction.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892.

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
